## XIII SIMPOSI DE NEUROBIOLOGIA

### Complexitat cel·lular en la funció i disfunció cerebral

28 i 29 de Maig de 2024  
Institut d'Estudis Catalans, Barcelona  
**Programa i resums de les comunicacions**

Amb el patrocini de:

Hospital del Mar  
Research Institute  
Barcelona

Panlab

EXCELENCIA  
MARÍA  
DE MAEZTU

SARSTEDT LICORbio

**BIOGEN** Científica  
COPROTECTOR CON LA INVESTIGACIÓN DESDE 1989

SENC SOCIEDAD  
ESPAÑOLA DE  
NEUROCIENCIA

**ciber | SAM** CENTRO DE INVESTIGACIÓN  
BIOMÉDICA EN RED  
Salud Mental

**ciber | NED** CENTRO DE INVESTIGACIÓN  
BIOMÉDICA EN RED  
Enfermedades Neurodegenerativas

Amb la participació de:

### **COMITÈ ORGANITZADOR**

---

**Ariadna Laguna (Coordinadora)**, Institut de Recerca de l'Hospital Vall Hebrón (VHIR), CIBERNED

**Xavier Altafaj**, Institut de Neurociències, Universitat de Barcelona, IDIBAPS

**Analía Bortolozzi**, Institut d'Investigacions Biomèdiques de Barcelona (IIBB), CSIC-IDIBAPS, CIBERSAM

**Arnau Busquets**, Institut de Recerca Hospital del Mar

**Francisco Ciruela**, IDIBELL, Institut de Neurociències, Universitat de Barcelona

**Joaquim Egea**, Institut de Recerca Biomèdica de Lleida, Universitat de Lleida

**Silvia Ginés**, Institut de Neurociències, Universitat de Barcelona, IDIBAPS, CIBERNED

**Carles A. Saura**, Institut de Neurociències, Universitat Autònoma de Barcelona, CIBERNED

**Josep Saura**, Institut de Neurociències, Universitat de Barcelona, IDIBAPS

**Montse Solé**, Institut de Neurociències, Universitat Autònoma de Barcelona, CIBERNED

### **SECRETARIA TÈCNICA**

---

**Mariàngels Gallego i Ribó**

**Paqui Lorite Garcia**

Societat Catalana de Biologia – Institut d'Estudis Catalans

**LOCALITZACIÓ**

**INSTITUT D'ESTUDIS CATALANS**  
**Carrer del Carme, 47**  
**Barcelona 08001**

**Dia 1: 28 Maig de 2024****Dia 2: 29 Maig de 2024**

8.30-9 h	<b>Registre i recollida de material</b>		
9-9.15 h	<b>Benvinguda i presentació</b> Sala: Prat de la Riba		
9.15-11h	<b>Sessió 1A Oral</b> <b>Cèl.lules glials i inflamació</b> Sala: Prat de la Riba  <b>Sessió 1B Oral</b> <b>Neurodesenvolupament i malalties relacionades</b> Sala: Pere i Joan Coromines	9-10.45 h	<b>Sessió 3A Oral</b> <b>Circuits neuronals i plasticitat cerebral</b> Sala: Prat de la Riba  <b>Sessió 3B Oral</b> <b>Sistemes motor i sensorial</b> Sala: Pere i Joan Coromines
11-12 h	<b>Cafè i sessió de Pòsters</b>	10.45-12 h	<b>Cafè i sessió de Pòsters</b>
12-13 h	<b>Conferència plenària 1</b> Sala: Prat de la Riba  <b>Prof. Isabel Fariñas, Universitat de València-CIBERNED</b> «The impact of neural stem cell heterogeneity on niche dynamics»	12-13 h	<b>Conferència plenària 3</b> Sala: Prat de la Riba  <b>Getrudis Perea, Instituto Cajal-CSIC</b> «Neuron-astrocyte signaling in stress-induced depressive-like states»
13-15h	<b>Dinar i sessió de pòsters</b>	13-15 h	<b>Dinar i sessió de pòsters</b>
15-16.45 h	<b>Sessió 2A Oral</b> <b>Malalties neurodegeneratives I</b> Sala: Prat de la Riba  <b>Sessió 2B Oral</b> <b>Receptors de neurotransmissors i senyalització</b> Sala: Pere i Joan Coromines	15-16.45 h	<b>Sessió 4A Oral</b> <b>Malalties neurodegeneratives II</b> Sala: Prat de la Riba  <b>Sessió 4B Oral</b> <b>Cognició i desordres mentals</b> Sala: Pere i Joan Coromines
16.45-17.45 h	<b>Conferència plenària 2</b> <b>Dr. Laurent Groc, CNRS/Bordeaux Université</b> Sala: Prat de la Riba  «Exploring brain cell communication at the single molecule level in health and disease: learning from the NMDA receptor»	16.45-17.45 h	<b>Conferència plenària 4</b> <b>6<sup>th</sup> Ramón Turró Award</b> Sala: Prat de la Riba  <b>Prof. Eduardo Soriano, Universitat de Barcelona, CIBERNED</b> «The 1996/1998 breakthrough: from Reelin and Cajal-Retzius cells to adult plasticity and Alzheimer's disease»
17.45-19.30h	<b>Refrigeri i sessió de pòsters</b>	17.45-18 h	<b>Premis i Clausura</b>
		18-20h	<b>FESTA DE CLAUSURA</b>

**Day 1: May 28<sup>th</sup> 2024****Day 2: May 29<sup>th</sup> 2024**

8.30-9 h	<b>Registration</b>		
9-9.15 h	<b>Welcome presentation</b> Room: Prat de la Riba		
9.15-11h	<b>Session 1A Oral</b> <b>Glial cells and inflammation</b> Room: Prat de la Riba  <b>Session 1B Oral</b> <b>Neurodevelopment and related diseases</b> Room: Pere i Joan Coromines	9-10.45h	<b>Session 3A Oral</b> <b>Neural circuits and brain plasticity</b> Room: Prat de la Riba  <b>Session 3B Oral</b> <b>Motor and sensory systems</b> Room: Pere i Joan Coromines
11-12 h	<b>Coffee and Poster session</b>	10.45-12h	<b>Coffee and Poster session</b>
12-13 h	<b>Plenary Lecture 1</b> Room: Prat de la Riba  <b>Prof. Isabel Fariñas, Universitat de València-CIBERNED</b> «The impact of neural stem cell heterogeneity on niche dynamics»	12-13h	<b>Plenary Lecture 3</b> Room: Prat de la Riba  <b>Getrudis Perea, Instituto Cajal-CSIC</b> «Neuron-astrocyte signaling in stress-induced depressive-like states »
13-15h	<b>Lunch and poster session</b>	13-15 h	<b>Lunch and poster session</b>
15.00-16.45 h	<b>Session 2A Oral</b> <b>Neurodegenerative diseases I</b> Room: Prat de la Riba  <b>Session 2B Oral</b> <b>Neurotransmitter receptors and signalling</b> Room: Pere i Joan Coromines	15.00-16.45h	<b>Session 4A Oral</b> <b>Neurodegenerative diseases II</b> Room: Prat de la Riba  <b>Session 4B Oral</b> <b>Cognition and mental disorders</b> Room: Pere i Joan Coromines
16.45-17.45 h	<b>Plenary Lecture 2</b> <b>Dr. Laurent Groc, CNRS/Bordeaux Université</b> Room: Prat de la Riba «Exploring brain cell communication at the single molecule level in health and disease: learning from the NMDA receptor»	16.45-17.45h	<b>Plenary Lecture 4</b> <b>6<sup>th</sup> Ramón Turró Award</b> Room: Prat de la Riba <b>Prof. Eduardo Soriano, Universitat de Barcelona, CIBERNED</b> «The 1996/1998 breakthrough: from Reelin and Cajal-Retzius cells to adult plasticity and Alzheimer's disease»
17.45-19.30h	<b>Drinks and poster session</b>	17.45-18h	<b>Awards and Closing</b>
		18-20h	<b>CLOSING PARTY</b>

**DAY 1: Tuesday, May 28<sup>th</sup> 2024**

8.30-9h	<b>REGISTRATION</b>
9-9.15h	<p><b>WELCOME PRESENTATION</b>  <i>Prat de la Riba Room</i>  Organizing Committee</p>
9.15-11h	<p><b>ORAL SESSIONS</b></p> <p><b>Session 1A. GLIAL CELLS AND INFLAMMATION</b>  <i>Room: Prat de la Riba</i></p> <p><b>Chair:</b> Mar Puigdellívol (Institut de Neurociències, Universitat de Barcelona; Institut de Neurociències-Universitat Autònoma de Barcelona)</p> <p><b>O.1.</b> Cannabidiol breaks the chains placed by A2AR on cannabinoid receptor 1 in ischemic stroke <b>Raïch I</b>  <b>O.2.</b> Phenotypic characterization of lipid droplet-accumulating microglia after cerebral ischemia <b>Pedragosa J</b>  <b>O.3.</b> Intravenous gene therapy provides long-term correction of cerebral white matter swelling and locomotor deficiencies in a mouse model of megalencephalic leukoencephalopathy with subcortical cysts. <b>Brao A</b>  <b>O.4.</b> Cannabidiol extends lifespan and improves clinical signs in a mouse model of leigh syndrome. <b>De Donato MH</b>  <b>O.5.</b> Astrocytic RTP801 is involved in neurodegeneration and neuroinflammation in alzheimer disease. <b>Chicote-Gozález A</b>  <b>O.6.</b> The gut-brain axis in a novel humanized transgenic mouse model for Parkinson's disease and brain aging. <b>Lorente-Picón M</b>  <b>O.7.</b> Elucidating the role of ATF3 in the neuropathology of a mouse model of leigh syndrome. <b>Blanco-Ramos M</b></p> <p><b>Session 1B. NEURODEVELOPMENT AND RELATED DISEASES</b>  <i>Room: Pere i Joan Coromines</i></p> <p><b>Chair:</b> Joaquim Egea (IRB Lleida, Universitat de Lleida)</p> <p><b>O.8.</b> CXCL14 is a key chemokine involved in axon guidance of pioneer axons of the statoacoustic ganglion. <b>Rumbo M</b>  <b>O.9.</b> Astrotactin 1 deficiency results in a novel neurodevelopmental disorder. <b>Gatnau-Civardi</b>  <b>O.10.</b> 4D-study of neuronal cell lineages and the generation of neuronal diversity in the zebrafish hindbrain. <b>Ortiz-Álvarez G</b>  <b>O.11.</b> The hidden side of NCAM family: NCAM2, a key cytoskeleton organization molecule regulating neuronal differentiation and synaptic formation in brain development. <b>Parcerisas A</b></p> <p><b>O.12.</b> The role of the RNA-binding protein staufen 2 during neurogenesis. <b>Fernández Moya SM</b></p>

	<p><b>O.13.</b> Ketogenic diet as a potential treatment for SPATA5-related encephalopathy: the power of mitochondrial modulation in the treatment of neurodevelopmental diseases. <b>Musokhranova U</b></p> <p><b>O.14.</b> Novel strategies to decrypt the complexity of growth cone responses: from signal integration to motile responses. <b>Ros O</b></p>
11.00-12.00	 <b>COFFEE BREAK and POSTERS</b>
12.00-13.00	<p><b>PLENARY LECTURE</b>  <i>Prat de la Riba Room</i>  Presented by: S. Ginés</p> <p><b>«The impact of neural stem cell heterogeneity on niche dynamics»</b>  <u>Isabel Fariñas</u> (Universitat de València-CIBERNED)</p>
13.00-15.00	 <b>LUNCH</b>
15.00- 16.45	<p><b>ORAL SESSIONS</b></p> <p><b>Session 2A. NEURODEGENERATIVE DISEASES I</b>  <i>Prat de la Riba room</i></p> <p><b>Chair:</b> Gemma Navarro (Institut de Neurociències, Universitat de Barcelona)</p> <p><b>O.15.</b> Role of NR2A and NR2B on the neuroprotective effects of CB1R in Alzheimer's disease. <b>Rebassa JB</b></p> <p><b>O.16.</b> Cell-type specific hippocampal alterations are associated with memory deficits in novel Alzheimer's disease transgenic mice. <b>Deprada A</b></p> <p><b>O.17.</b> Evaluation of the functional activity in synaptic genes related to polygenic risk for Alzheimer's disease using a massively parallel reporter assay. <b>Perlaza D</b></p> <p><b>O.18.</b> Single-cell transcriptomics analyses unveil post-transcriptional regulation alterations in iPSC-derived neuron and glia cells from Alzheimer's disease patients. <b>Gutiérrez-Franco A</b></p> <p><b>O.19.</b> Pathological interplay between alpha-synuclein and neuromelanin accelerates Parkinson's disease pathology in melanized rodents. <b>Nicolau-Vera A</b></p> <p><b>O.20.</b> Deciphering serotonergic synaptic alterations in synucleinopathy and depression copathology mouse model. <b>Sarriés-Serrano U</b></p> <p><b>O.21.</b> The uncharted non-coding layer of the human transcriptome reveals potential new players in brain (patho)physiology. <b>Perteghella T</b></p> <p><b>Session 2B. NEUROTRANSMITTER RECEPTORS and SIGNALING</b>  <i>Pere i Joan Coromines Room</i></p>

	<p><b>Chair:</b> Alex Bayés (Institut de Recerca, Hospital Santa Creu i Sant Pau)</p> <p><b>O.22.</b> Synaptic proteome diversity is primarily driven by gene regulation of glutamate receptors and their regulatory proteins. <b>Bayés À</b></p> <p><b>O.23.</b> Mouse cortical astrocytes detect dopamine via non-cognate receptors. <b>Pittolo S</b></p> <p><b>O.24.</b> In vivo photocontrol of inhibitory brain receptors. <b>Maleeva G</b></p> <p><b>O.25.</b> Three-photon infrared stimulation of endogenous neuroreceptors in vivo. <b>Sortino R</b></p> <p><b>O.26.</b> Deep-phenotype characterization of GRIN1 zebrafish models, a new tool to study GRIN-related disorders. <b>Locubiche-Serra S</b></p> <p><b>Llopard N</b></p> <p><b>O.27.</b> Comprehensive delineation and precision medicine of GRIN-related neurodevelopmental disorders, a primary disturbance of the NMDA receptor. <b>Altafaj X</b></p> <p><b>O.28.</b> Metabolic characterization of neurodevelopmental disorders involving glutamatergic neurotransmission. <b>Illescas S</b></p>
16.30-17.30	<p><b>PLENARY LECTURE</b>  <i>Prat de la Riba Room</i>  Presented by: X. Altafaj</p> <p><b>« Exploring brain cell communication at the single molecule level in health and disease: learning from the NMDA receptor »</b>  <u>Laurent Groc</u> (CNRS/Bordeaux Université)</p>
17.45- 19.30h	<b>Drinks and poster session</b>

**DAY 2: Wednesday, May 29<sup>th</sup> 2024**

9-10.45h	<p><b>ORAL SESSIONS</b></p> <p><b>Session 3A. NEURAL CIRCUITS AND BRAIN PLASTICITY</b>  <i>Prat de la Riba Room</i></p> <p><b>Chair: Jordi Bonaventura (Institut de Neurociències, Universitat de Barcelona)</b></p> <p><b>O.29.</b> Epigallocatechin-3-gallate pretreatment as a new neuroprotective therapy against polymyxin induced neurotoxicity. <b>Guzman L</b></p> <p><b>O.30.</b> TRESK channel modulates CA3 pyramidal neurons' excitability and hippocampal synaptic plasticity. <b>Lluís H</b></p> <p><b>O.31.</b> Light-dependent cAMP modulation in astrocytes trigger synaptic potentiation, hemodynamic responses and behavioural changes in mice: role in huntington's disease. <b>Sitjà-Roqueta L</b></p> <p><b>O.32.</b> Exploring the dopaminergic effects of S-Ketamine. <b>Rizzo A</b></p> <p><b>O.33.</b> Decoding incidental associations: role of amygdala in sensory preconditioning. <b>González-Parra JA</b></p> <p><b>O.34.</b> Effects of the poly I:C model of schizophrenia on thalamic inhibitory circuits. <b>Beltran M</b></p> <p><b>O.35.</b> Structural plasticity of dendritic spines during long-term synaptic depression. <b>Rojo-Francàs E</b></p> <p><b>Session 3B. SENSORY AND MOTOR SYSTEMS</b>  <i>Pere i Joan Coromines Room</i></p> <p><b>Chair: Xavier Gasull (Institut de Neurociències, Universitat de Barcelona, IDIBAPS)</b></p> <p><b>O.36.</b> Not just a highway: the role of the spinal cord in rats' forelimb skilled function. <b>López-Santos D</b></p> <p><b>O.37.</b> 4-deep brain reconstruction: a 3D-printed mini-brain based on pluripotent stem cells differentiation. <b>Louail A</b></p> <p><b>O.38.</b> Dynamics of noise-induced neurodegeneration and neuroplasticity in the central nervous system. <b>Giménez-Esbrí V</b></p> <p><b>O.39.</b> Transcriptomics and proteomics unravel molecular safeguards of klotho in ALS. <b>Verdés S</b></p> <p><b>O.40.</b> Deciphering the role of extracellular matrix in ALS pathophysiology. <b>Soares GP</b></p> <p><b>O.41.</b> Central and peripheral delivery of ASO 10-27 increases lifespan, improves motor function and preserves excitatory synaptic integrity and neuromuscular junction morphology in a severe mouse model of SMA. <b>Guillamón P</b></p>
----------	--

	<p><b>0.42.</b> Superior colliculus as a key player in huntington's disease sensorimotor coordination deficits: from circuits to behaviour. <b>Küçükerden M</b></p>
10.45-12.00	<span style="color: #8B4513;">☕</span> <b>COFFEE BREAK and POSTERS</b>
12.00-13.00	<p><b>PLENARY LECTURE</b>  <i>Prat de la Riba Room</i>  Presented by: A.Busquets-Garcia</p> <p><b>«Neuron-astrocyte signaling in stress-induced depressive-like states»</b>  <u>Getrudis Perea</u> (Instituto Cajal-CSIC)</p>
13.00-15.00	<span style="color: #8B4513;">🍽</span> <b>LUNCH and POSTERS</b>
15.00-16.45	<p><b>ORAL SESSION</b>  <b>Session 4A. NEURODEGENERATIVE DISEASES II</b>  <i>Prat de la Riba Room</i></p> <p><b>Chair:</b> Mireya Plass (Institut d'Investigació Biomèdica de Bellvitge, CIBER-BBN)</p> <p><b>0.43.</b> Regional and cell-type specific mechanisms of cannabidiol benefit in a model of mitochondrial neuropathy. <b>Van der Walt G</b></p> <p><b>0.44.</b> Alteration of hippocampal CB1R can drive gabaergic dysfunction leading to cognitive decline in Huntington's disease. <b>Di Franco N</b></p> <p><b>0.45.</b> CD200-based cell sorting generates homogeneous subpopulations of transplantable striatal neuroblasts. <b>Gomis C</b></p> <p><b>0.46.</b> Developing an induced pluripotent stem cell (iPSC)-based model to identify the molecular mechanisms governing the neurodegenerative disease Multiple System Atrophy. <b>Alemany-Ribes M</b></p> <p><b>0.47.</b> Increased neurogenesis and behavior performance by in vivo reprogramming. <b>Zaballa S</b></p> <p><b>0.48.</b> Study of cell trafficking for the description of personalized therapies in pediatric movement disorders. <b>Díaz-Osorio Y</b></p> <p><b>0.49.</b> AAV9-mediated expression of secreted klotho reduced several aging-associated phenotypes, improving cognitive capacities and increasing longevity. <b>Roig-Soriano J</b></p> <p><b>Session 4B. COGNITION AND MENTAL DISORDERS</b>  <i>Pere i Joan Coromines Room</i></p> <p><b>Chair:</b> Albert Giralt (Institut de Neurociències, Universitat de Barcelona)</p>

	<p><b>O.50.</b> <math>\beta</math>-hydroxybutyrate counteracts the deleterious effects of a saturated high-fat diet on synaptic AMPA receptors and cognitive performance. <b>Fadó R</b></p> <p><b>O.51.</b> Sex differences in fear memory processing in mice and humans. <b>Andero R</b></p> <p><b>O.52.</b> Small RNAs are important contributors in the cognitive symptoms associated with schizophrenia. <b>Galán-Ganga M</b></p> <p><b>O.53.</b> Cell type-specific effects of chronic THC exposure on hippocampal plasticity revealed by RNAseq. <b>Kouchaeknejad A</b></p> <p><b>O.54.</b> Understanding the neuro-immune alterations in schizophrenia: the implication of the IKAROS family. <b>Ballasch I</b></p> <p><b>O.55.</b> Astrotactin 1 deficiency results in a novel neurodevelopmental disorder. <b>Gatnau-Civardi C</b></p> <p><b>O.56.</b> Sex-specific changes in miRNA profile in the prefrontal cortex of depressed suicidal subjects. <b>Miquel-Rio L</b></p>
16.45-17.45	<p><b>6th RAMON TURRÓ AWARD</b> honoring the most cited articles in Neurobiology performed in Catalunya published in 1996-98  <i>Prat de la Riba Room</i>  Presented by: J. Saura</p> <p><b>ACCEPTANCE LECTURE</b>  <b>« The 1996/1998 breakthrough: from Reelin and Cajal-Retzius cells to adult plasticity and Alzheimer's disease»</b></p> <p><u>Prof. Eduardo Soriano</u> (Institut de Neurociències-Universitat de Barcelona, CIBERNED)</p>
17.45-18.00	<p><b>BEST POSTERS AWARDS</b> at the XIII Symposium  <i>Prat de la Riba room</i></p> <p><b>CLOSING SPEECH:</b> <u>Organizing Committee</u></p>
18.00-20.00	<p><b>CLOSING PARTY</b></p>
